Microsoft Power Platform certification portfolio

Drive success with Microsoft Certifications

Open doors to new career possibilities. Choose the certification that's right for you, based on the recommended skills, knowledge, and experience for each exam.

Power Platform Fundamentals Exam PL-900	Power Platform App Maker Associate Exam PL-100	Power Platform Functional Consultant Associate Exam PL-200
Prove you understand the core capabilities of Microsoft Power Platform—from business value and core product capabilities to building a simple Power Apps canvas app, connecting data sources, automating basic business processes with Power Automate, and creating a Power BI dashboard.	The app maker builds solutions to simplify, automate, and transform processes and tasks using Microsoft Power Platform.	Microsoft Power Platform functional consultants have broad applied knowledge of Microsoft Power Platform, including practical understanding of capabilities, boundaries, and constraints. They have experience using Microsoft Power Platform tools to create solutions that use Microsoft Power Platform and Microsoft 365. They have proficiency in data modeling, user experience design, requirements analysis, and process analysis.
• Describe the business value of Microsoft Power Platform • Identify foundational components of Microsoft Power Platform • Demonstrate the capabilities of Power BI • Demonstrate the capabilities of Power Apps • Demonstrate the capabilities of Power Automate • Demonstrate complementary Microsoft Power Platform solutions	• Design business solutions • Analyze and visualize data • Create business solutions	• Configure Microsoft Dataverse • Create apps by using Power Apps • Create and manage process automation • Describe Power Virtual Agents • Import and visualize data by using dataflows and Power BI • Define an environment strategy

Microsoft Power Platform certification portfolio

Drive success with Microsoft Certifications

Power BI Data Analyst Associate Exam PL-300	Microsoft Power Platform Developer Associate Exam PL-400	Power Automate RPA Developer Associate Exam PL-500	Power Platform Solution Architect Expert Exam PL-600
Data analysts help businesses to maximize the value of their data assets using Microsoft Power BI.	Microsoft Power Platform developers design, develop, secure, and troubleshoot Microsoft Power Platform solutions. They implement components of the solution that include application enhancements, custom user experience, system integrations, data conversions, custom process automation, and custom visualizations.	RPA Developers automate time-consuming and repetitive tasks by using Microsoft Power Automate. They review solution requirements, create process documentation, and design, develop, troubleshoot, and evaluate solutions. They work with business stakeholders to improve and automate business workflows. They collaborate with administrators to deploy solutions to production environments, and they support solutions.	Solution architects for Microsoft Power Platform lead successful implementations and focus on how solutions address the broader business and technical needs of organizations.
• Prepare the data • Model the data • Visualize and analyze the data • Deploy and maintain assets	• Create a technical design • Configure Microsoft Dataverse • Create and configure Power Apps • Extend the user experience • Extend the platform • Develop integrations	• Design automations • Develop automations • Deploy and manage automations	• Perform solution envisioning and requirement analyses • Architect a solution • Implement the solution
